SUBJECT INDEX

A

ABO antigens, 106
Acquired immunodeficiency syndrome (see AIDS)
Activities for daily living, 274
Aflatoxin, 70, 79
AIDS
  children and, 186, 190–91
  future of public health and, 9
  global epidemiologic patterns of, 128–32
  global response to, 134–41
  medically indigent and, 383
  nutrition and, 59
  prevention and control of
    1980s, 135–36
    1990s, 137–41
  projections of infections in the 1990s of, 133–34
  research and new technologies and, 140
  zidovudine (AZT) and, 140
Alcohol abuse
  injury and, 259–62
Alcohol use
  cancer and, 145, 155
Alma-Ata Declaration, 152, 170, 328–29
American Heart Association
  health promotion and, 327
Ames test, 34
Arms race
  cold war and, 40–41
  federal budget and, 40–41
  public health policy and, 40–41
Asbestosis, 10
Asia
  fertility rates in, 337–41
  life expectancy in, 337–41
Attributable risk
  toxics exposure and, 76–77
Avitaminosis A
  blindness and, 56
  International Vitamin A Consultive Group (IVACG) and, 57
  measles and, 56
  WHO administration and immunization program for, 56–57
AZT, 140

B

Back disorders
  occupational injury and, 92
Behavior and health
  health-related, 319–23
  relapse prevention and, 321
  sedentary, 320–23
  sexual, 320–23
Behavioral risk fact surveillance system, 281
Benzene, 71, 81–83
Benzene exposure
  child labor and, 361, 373
Biomarkers
  toxic chemical injury and, 31
Blindness
  avitaminosis A and, 56
Bombesin, 115–16

C

Canada
  disability-free life expectancy in, 44–45
  health promotion in, 44–45
  Ottawa Charter for Health Promotion of, 44
  universal health insurance in, 42, 44–45
Canadian Task Force on the Periodic Health Examination, 414
Cancer
  alcohol and, 60, 145, 155
  bladder, 149
  breast, 111, 144–48
    familial polyposis coli and, 111
  Chinese and, 147
  colon/rectum, 111, 144, 147
  costs of, 154
  cure for, 161
  demographic trends and, 144
  developing countries and, 157–58
  diet and, 145, 146–48, 150, 155–56
  dietary fiber and, 61
  epidemiology of, 72, 76–77, 149–55
  esophageal, 60, 156
  familial aggregation of, 110
  gastric, 144, 146–47
  genes and, 109–111
  hepatocellular carcinoma, 119
    hepatitis B virus and, 119
  Japanese and, 147
  lung, 144–55
  malignant melanoma, 156–57
  migrants and, 147–48
  nutrition and, 60–61
    smoking and, 61
  occupational exposure and, 148–49
  prostate, 144, 147
  retinoblastoma, 110
  screening for, 158
  stomach, 60
  sunlight and, 156–57
  susceptibility to, 148–49
  tobacco use and, 145–46, 153–155
  US trends in mortality from, 56
  world burden of, 143–50
Cancer incidence
  demographic trends and, 144–61
  world-wide, 143–61
Cancer intervention, 149, 156
Cancer mortality
  proportion attributed to various causes, 83–84
  world-wide, 143–61
Cancer prevention, 143–61, 152–59
  primary, 152–58
  secondary, 158–59
  tertiary, 159
Cancer screening, 2
Capitated prepayment, 298–301
Carcinogenesis
  biological agents of, 151
  multigeneration, 148
  perinatal, 148
  transplacental exposure and, 150
Carcinogens
  genotoxic, 69–85
  maximum tolerated dose of, 72–73
  regulation of, 78–83
  risk analysis and, 74–78
  risk from environmental, 83–84

structural activity relationship and, 72, 77–78
Cardiovascular disease
gene expression and, 108–9
Chemical industry
public health and, 24–25
Chemicals
synthetic organic, 69–85
toxic, 69–85
Child abuse, 194
Child care, 198–99
Child labor, 359–73
current extent in US of, 365–67
Fair Labor Standard Act, 364–65
hearing loss and, 370–71
history of, 362–64
Triangle Shirtwaist Fire and, 363, 367
industrial homework and, 359, 372
injury hazards of, 360–61, 364–73
urban, 367–68
rural, 369–71
suburban, 368–69
international, 371
pesticides and, 359–61, 367–68, 373
prevention and, 370–73
toxic exposure and, 359–61, 367–68, 373
benzene, 361
formaldehyde, 361
organophosphate pesticides, 361
Children
AIDS and, 186, 191–93
disabilities and chronic illness among, 196–98
health in US of, 185–202
health insurance and, 186
immunization rates among, 186, 190–91
mortality among, 185–90
"new mortality" among, 186, 193–96
poverty among, 185
pregnancy among, 195–96
school drop-out among, 196
sociodemographic trends and, 198–200
violence and, 193–94
Cholecystokinin, 115–16
Cholesterol, 108–9, 118
Chronic diseases, 267–93
current patterns of, 267–83
determinants of, 281
disability and, 273–73
disease burden of, 275–73
mortality trends in, 267–83
prevention of, 285–91
clinical preventive medicine and, 290
community-based programs and, 290
screening and, 289–90
social marketing and, 290–91
social regulation and, 291
socioeconomic disparities in, 281–84
breast cancer and, 283
hypertension and, 283
ischemic heart disease and, 283
Chronic energy deficiency, 53–54
cognitive development in children and, 54
Chronic musculoskeletal disorders
occupational hazards and, 93–97
Swedish experience and, 93–94
work pace and, 97
Clean Water Act, 423, 425–26
Clinical preventive medicine
chronic diseases and, 290
Cold war
public health policy and, 40–41
Community-based programs
chronic diseases and, 290
Comprehensive Environmental Response, Compensation and Liability Act of 1980 (CERCLA), 421–24
Coronary heart disease
US trends in mortality from, 5–6
Cumulative trauma disorders, 92, 95

D

Death
avoidable adult, 349
major causes of
epidemiolgic transition in, 342
developing countries and, 342
health-related behavior and, 320–23
Delaney Amendment, 78–81
Demographic transition
developing countries and, 337–42
Developing countries
changing patterns of disease in, 335–50
chronic diseases in, 342–45, 352–57
demographic transition in, 337–42
epidemiologic polarization in, 347–50
epidemiologic transition in, 342–46
fertility rates in, 337–42
health sector in, 335–57
health services in, 342, 350–55
infant mortality in, 347–50, 352–53
infectious diseases in, 335, 342, 344, 349, 352–56
life expectancy in, 337–42
population growth in, 338–39
resource allocation in, 350–55
case management interventions and, 355
direct investments and, 351–52
primary prevention and, 352–55
regulation/legislation and, 351
taxes/subsidies and, 351
Diabetes mellitus
genetic variation and, 108–9, 112–14
insulin-dependent, 112
familial aggregation of, 112
Mexican-Americans and, 112
Native Americans and, 112–14
non-insulin-dependent, 106, 108, 112–18
familial aggregation in, 112
obesity and, 113–17
Pima Indians and, 112–14
type II
nutrition and, 60
Diet, 62, 145, 147–48, 150, 155–56, 320–23
cancer incidence and, 145, 147–48, 150, 155–56
disease prevention and, 62
Dietary guidelines for health, 62–63
Disease
cardiovascular, 108–9
changing patterns in developing countries of, 335–50
demographic transition and, 336–42
epidemiologic polarization and, 336, 347–50
epidemiologic transition and, 336, 342–46
chronic, 106, 320–23, 342–45, 352–57

cancer, 342, 344–45
cardiovascular, 342, 344–46
communicable, 320–23
communicable childhood, 335–36
international efforts to control, 335–36, 347–53
degenerative, 320–23
gallbladder, 106
genetic variation and, 108
heterogeneity in, 107
infectious, 335, 342, 344, 349, 352–56
inherited
screening for, 105
lifestyle and, 344–54
personal behavior and, 344–53
tobacco use and, 344–45, 353–54
Disease–gene marker association, 107
ethnic variation in, 107
Disease prevention
environmental, 47
infectious, 46
mental, 47
noninfectious, 46
occupational, 47
sexually transmitted, 46
Drownings, 253, 263–64
Drug abuse
injury and, 259–60, 263
prevention of, 47

E

Elderly
nutrition and, 61–62
Employee Retirement Income Security Act (ERISA), 392–93
Environmental health hazards
governmental regulation of, 419–33
groundwater and, 423–25
international regulatory initiatives for, 431–33
radioactive waste and, 427–28
waste reduction and minimization and, 426–27
weapons production and, 427–28
workplace and, 419–21
Environmental manipulation
gene expression and, 108
Environmental Protection Agency (EPA)
Research Strategies for the 1990s Committee of the, 29
funding within, 30
Epidemiologic transition
developing countries and, 342–46
Epidemiology
cancer, 72, 76–77, 149–55
chronic disease and, 105–6
genetic disease and, 105–6
metabolic, 152
molecular, 32, 105–20, 152
toxicology and, 29–36
Erythroblastosis fetalis, 106
EVALU-LIFE, 406

F

Fair Labor Standards Act, 364–65
Familial aggregation
body weight and, 117
cancer and, 110
diabetes mellitus and, 112
Familial polypsis coli, 111
Family violence
injury from, 261
Famine, 65–65
agricultural production and, 64–65
civil war and, 64–65
drought and, 64–65
Fat
dietary
cancer incidence and, 147, 150
Federal Insecticide, Fungicide and Rodenicide Act, 424
Fee-for-service payment system, 298, 316
Fertility rates
demographic transition and, 337–42
health services and, 342
developing world and, 337–42
Fertility transition, 338–39
Fertilizers, 69–72
Fiber
dietary
cancer incidence and, 147, 150, 155–56
Firearms
injury from, 260–63
Fire-related injuries, 253, 264
Fire-Safe Cigarette Act, 47
Food
processing of, 64
production of, 63
(See also Diet, Malnutrition, Nutrition)
Food, Drug and Cosmetic Act
Delaney Amendment to, 78–81
Ford Foundation
health promotion and, 327
Frailty
US trends in, 7
Framingham study, 405
Fruit
dietary
cancer incidence and, 147, 155–56

G

Gall bladder, 106
Gallium arsenide, 90
Gene expression, 105
environmental manipulation and, 108
General assistance medical care, 383
Genes
cancer-predisposing, 109
common diseases and, 108–17
Genetic heterogeneity
inherited disease and, 109–11, 113, 118–19
Genetic variation
disease and, 108
Greenhouse effect, 430–33

H

Haplotype, 107
Hatch-Wyden Amendment, 30
Hawaii's Prepaid Health Care Act, 392
Hazardous materials
detection and evaluation of, 30
Health
inequities in, 178–80
positive
definition and measurement of, 166–69
Health care
access to, 179–80
cost increases of, 394
Medicaid and, 378–88
improving quality of, 175–78
uninsured population and, 377–96
California programs for, 384–85
financing of public hospitals and clinics and, 383–84
Maine programs for, 383
Massachusetts programs for, 383

state entitlement programs for, 382–83, 385–86
uncompensated care and, 384, 386–88
Vermont programs for, 383
Health departments, 1–4
history of, 1–2
schools of public health and, 4
social welfare agencies and, 2
Health education, 313–30
health-directed behavior and, 313
health services use and, 324–25
learning theory and, 329
National Center for Health Education and, 327
National Health Planning and Resource Development Act of 1974 and, 325
participation and, 313, 329
President's Committee on Health Education and, 325, 327
self-care and, 326
smoking cessation programs and, 320–21
"Health for All by the Year 2000" (See Alma-Ata Declaration)
Health insurance
catastrophic expenses and, 388–89
children and, 186
employer mandates for, 392–94
high-risk persons and, 388–89
Medicaid, 378–88
public health policy and, 40
small employer tax credit programs for, 390
uninsured populations and, 377–96
universal, 42, 44–45, 48–50, 394–96
Canada and, 42, 44
(See also Health care, Uninsured populations)
Health Maintenance Organization Act of 1973, 325
Health maintenance organizations (HMOs), 297–317
group model of, 300–1
independent practice association model of, 300–1
staff model of, 300–1
Health objectives (See National health objectives)
Health promotion, 16–22, 43–45, 319–30
access to medical care and, 43–44
Alma-Ata Declaration and, 328–29
American Heart Association and, 327
Canada and, 328
citizen participation and, 326
community, 19–20, 321–23, 329
definition of, 321
federal initiatives for, 328
Ford Foundation and, 328
global initiatives for, 328–30
health education and, 319–30
health-related behavior and, 320
independent sector initiatives for, 327–28
Kaiser Foundation and, 328
Kellogg Foundation and, 328
learning theory and, 329
nutrition labeling and, 324
mass media and, 322
Ottawa Charter for, 17
National Center of Health Education and, 327
patient education and, 320
Population Council and, 328
private sector initiatives for, 327
renaissance of, 323–29
risk factors and, 18–19
Robert Wood Johnson Foundation and, 327–28
Rockefeller Foundation and, 328
school programs for, 21–22
smoking initiatives and, 324
social reforms and, 323–24
standard of living and, 43
Surgeon General's Report on Health Promotion and Disease Prevention and, 320
UNICEF and, 328–30
wellness programs, 327
World Health Organization and, 328–30
worksite, 19–21, 324, 330
year 2000 objectives for, 323
Health promotion policy, 319–30
historical perspective on, 324–30
Health-related behavior, 319–23
leading causes of death and, 320
relapse prevention and, 321
sedentary, 320
sexual, 320
Health risk appraisal, 401–17
health care organization and, 413–14
technical developments for, 411–12
worksite, 404
Health services
access to, 324–25
developing countries and, 342, 350–57
demographic transition and, 342
Health status, 165–80, 185–202
child, 185–202
socioeconomic and racial disparity in, 188
theoretical model for, 173–75
Health status measurement, 165–80
child, 170–71
community, 169–70
non-preference-weighted, 171–73
positive health and, 166–69
preference-weighted, 171–73
Hearing loss
child labor and, 370–71
industrial noise and, 95–96
Heart disease
nutrition and, 59
Hepatitis B carrier state, 149, 151
Hepatitis B virus
hepatocellular carcinoma and, 119
Hepatocellular carcinoma
hepatitis B virus and, 119
Heterogeneity
genetic
inherited disease and, 109–11, 113, 118–19
Hill-Burton Act, 324
HIV
global epidemiologic patterns of, 128–32
global response to, 134–41
future of public health and, 9
modes of transmission of, 127
prevention and control of
1980s, 135–36
1990s, 137–41
projections of infections in the 1990s of, 132–33
research and new technologies and, 140
(See also AIDS, HIV/AIDS pandemic)
HIV/AIDS pandemic, 127–41
global epidemiologic patterns of, 128–32
global response to, 134–41
global solidarity and, 140–41
projections of infections in the 1990s of, 132–34
research and new technologies for, 140

(See also AIDS, HIV)
Homelessness
public health policy and, 40
Homicide, 193–94, 253, 260, 263
children and, 193–94
Human immunodeficiency virus (See HIV; see also AIDS)
Hunger
agricultural production and, 64–65
civil war and, 64–65
drought and, 64–65
public health policy and, 40
US health and, 22–24
Hypercholestrolemia
familial, 118
Hyptertension, 59–60, 106
nutrition and, 59–60

I

Immunization
children and, 186, 190–91
Independent practice association, 300–3, 316
Industrial homework
child labor and, 359, 372
Industrial noise
hearing impairment and, 95–96
Infant mortality
developing countries and, 347–50, 352–53
prenatal care and, 47
public health policy and, 40
US trends in, 4
Infection
nutrition and, 58–59
Inherited diseases
screening for, 105
Injury
alcohol abuse and, 259–62
assaults and, 260, 263
control of
community involvement and, 264–65
legislation for, 257
litigation and, 257–58
costs to society of, 253–54
drownings and, 253, 263–64
drug abuse and, 259–62
falls and, 262–63
elderly and, 262
family violence and, 261
fire, 253, 264
firearms and, 260–61
intentional, 251–52, 254, 258–63
international perspective on, 264–65
homicide and, 260, 263
machine-related, 263
morbidity from, 252, 258–65
mortality from, 252–53, 258–65
motor vehicles and, 262–63
poisonings, 253, 263
drug use and, 263
sexual assault and, 261
suicide and, 260
traumatic, 264
unintentional, 251–65
US national program to prevent, 254–57
workplace, 263
Injury prevention, 47, 89–102, 251–65
occupational, 89–102
back disorders and, 92
chronic musculoskeletal disorders and, 92–95, 97
cumulative trauma disorders and, 92, 95
hearing impairment and, 92, 95–96
Institute of Medicine Committee on the Future of Public Health, 1–4, 11–12
International Committee on Iodine Deficiency Disorders, 56
International Dietary Energy Consultive Group, 54
International Vitamin A Consultive Group (IVACG), 57
Intervention
cancer, 149, 156
Iodine deficiency disorders, 55–56
International Committee on, 56
WHO prevention program for, 56
Iron deficiency, 54–55

K

Kaiser (Henry J.) Family Foundation
health promotion and, 327
Kellogg (W. K.) Foundation
health promotion and, 327
Kwashiorkor, 57

L

Lalonde Report, 13, 328
Latin America
fertility rates in, 337–42
life expectancy in, 337–42
Lead, 69
Legionnaire's disease, 9–10
Life expectancy, 6–7, 44–45, 323, 337–42
developing world and, 337–42
disability-free, 44–45
functional ability and, 323
Lifestyle, 320–23
Linkage analysis, 111, 113–14, 119
Lipoprotein lipase
atherosclerosis and, 116
obesity and, 116
Low-level Radioactive Waste Policy Act (Low-Level Act), 428
Lyme disease, 10

M

Major histocompatibility complex, 106–7
Malaria, 108
Malignant melanoma, 156–57
Malnutrition, 53–59, 64–65
protein-caloric
children and, 57–58
Maternal mortality
US trends in, 5
Marasmus, 57
Masss media
health promotion and, 322
Maximum tolerated dose
carcinogens and, 72–73
Measles
avitaminosis A and, 56
Medicaid, 378–88
access to, 380–81
eligibility for, 379–80
reforms of, 381–82
West Virginia and, 381
Oregon and, 381
Medical care
access to, 43
Canada and, 42, 44–45
national, 42, 44–45, 48–50
Medical practice
organization of, 297–304
solo practice, 297
multispecialty group practice, 298–304
Medicare Economic Index (MEI), 311
Mercury, 69–70
Mexican-Americans
diabetes mellitus among, 112
obesity among, 117
Middle East
fertility rates in, 337–41
life expectancy in, 337–41
Molecular biology, 106
Montreal Protocol, 432
Morbidity
poverty and, 7–9, 11, 22–24
US trends in, 4–11
Mortality
adolescent, 185
cancer, 5–6

childhood, 185–87
chronic disease, 4–11
communicable disease, 5–6, 11
coronary heart disease, 5
infant, 4, 196–90
maternal, 5
poverty and, 7–9, 11, 22–24
neonatal, 188
US trends in, 4–11
Multispecialty group practice, 298–304

N

National Association for Public Health Policy, 45–46, 48
proposal of national medical care system of, 48
National Center for Health Education, 327
National Environmental Policy Act (NEPA), 426
National health insurance
universal, 394–96
National health objectives (See National Health Objectives Act, US national health objectives)
National Health Objectives Act, 46
National Health Planning and Resource Development Act of 1974, 325
health education and, 325
National Institute for Occupational Safety and Health, 41–42
National Institute of Environmental Health
Superfund Amendments and Reauthorization Act and, 30
university health-related research and, 30
National medical care system
Canada and, 42, 44–45
National Association for Public Health Policy proposal for, 48–49
Nation's Health Objectives for the Year 2000, 45–46
Native American Indians
diabetes mellitus among, 112–14
Pima, 112–14
obesity among, 117
Noise-induced hearing impairment, 92, 95–96, 370–71
